**CLEANING AND PACKAGING**

HAM-LET H-900HP Relief Valves are treated with the HAM-LET Passivation Cleaning and Packaging (Procedure 8075). Oxygen Cleaning and Packaging (Procedure 8055) is available as an option.

**TESTING**

The HAM-LET H-900HP Relief Valves design has been tested for Proof and Burst. Every H-900HP Relief Valve is factory tested for proper set and re-sealing performance.

**SETTING AND RESEALING PRESSURE**

- Upstream set pressure is the first indicator of flow process. Every pressure relief after the first is repeatable within a deviation of 5% at room temperature.
- Blocked upstream set pressure is the first indicator of a stopped flow process and is always lower than the set pressure.

H-900HP RESEAL PRESSURE

H-900HP	100 - 200 (6.8 to 13.7)	50
	850 - 1000 (58.5 to 68.9)	84

**APPLICATIONS**

H-900HP relief valves gradually open when pressure increases. As such, they are not certified to ASME due to not having capacity rating at a given pressure rise (accumulation).

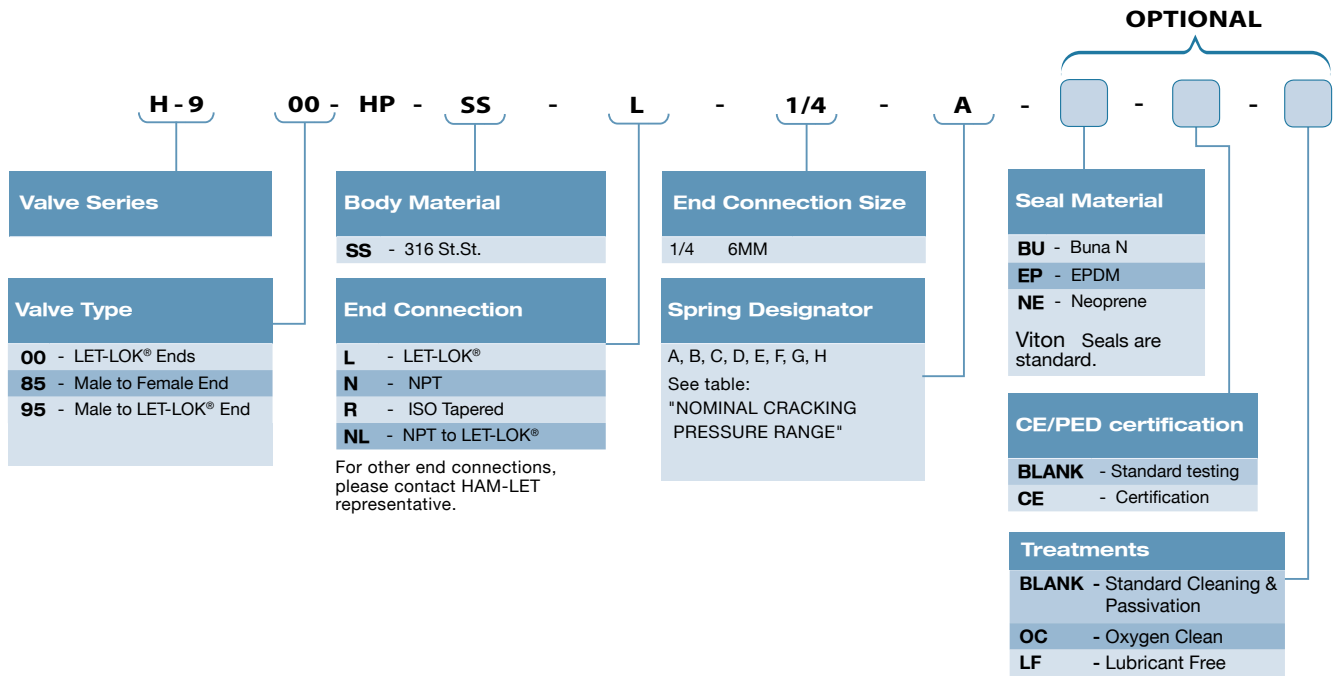

**OPERATION**

H-900HP relief valves open when system pressure gets to the set pressure and close when system pressure drops below the set pressure.

**Warning**

- Valves that were not actuated for some time may contain pressure higher than the set pressure.
- System designer and users shall determine what system applications require using relief valves for meeting specific safety codes and which valves conform to such codes.

**Warning**-Select the right component for safety's sake: The total design of the system must be taken into consideration when selecting components in order to ensure that your HAM-LET products provide safe, trouble-free operation. It is the responsibility of the system designer and the user to consider the compatibility of the materials, of the components and system, the function of the component, appropriate ratings and to ensure proper installation, operation and maintenance. Improper selection or use of products can cause property damage or personal injury, in respect of which the system designer and/or the user shall be solely liable and responsible.
